

GRADE 5 WARM/COOL COLOR ART PROJECT

5th Grade Students:

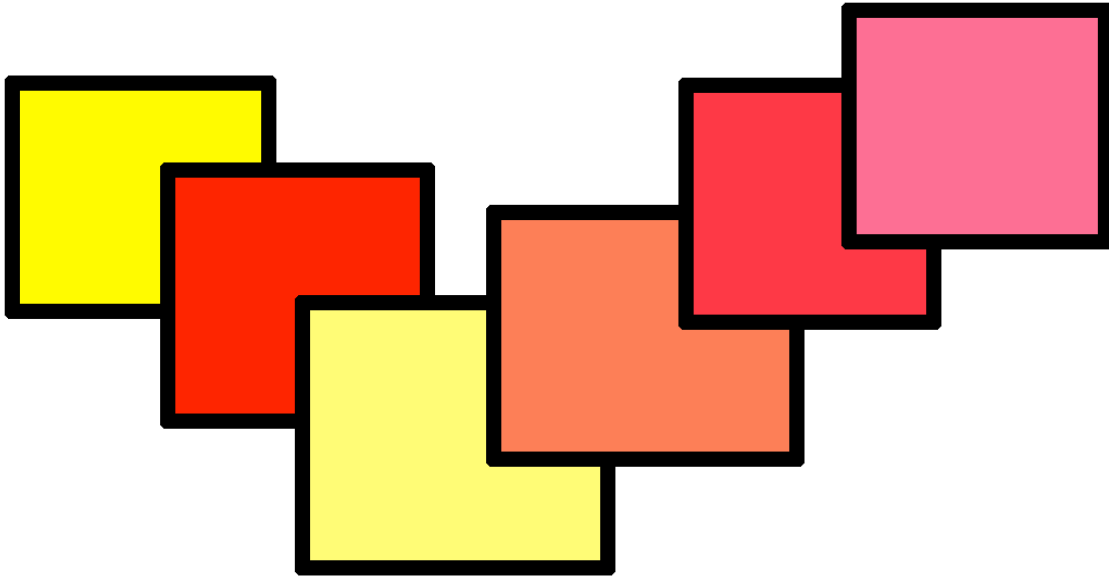

Attached is a copy of the art project we created in tech class using "Paintbrush".

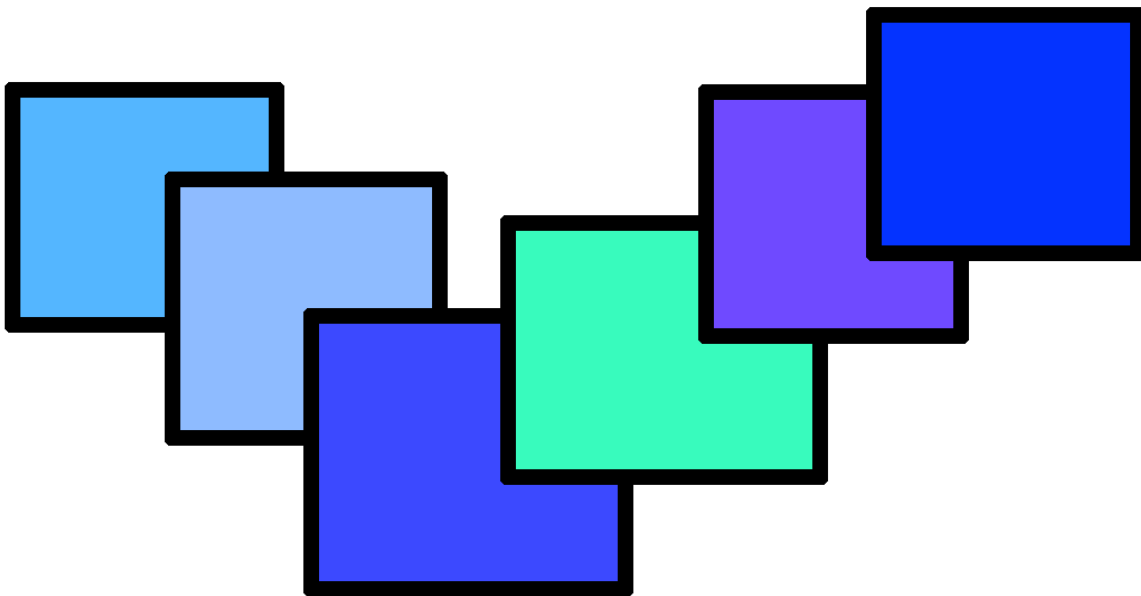

1. Your design was to be divided into 7 "pie" sections. You are to color alternating sections with warm colors (reds, oranges, yellows). The other sections will be in cool colors (blues, violets, greens). For example: Sections 1, 3, 5, & 7 can be cool; sections 2, 4, & 6 can be warm.
2. More info, a color wheel and a colored finished example can be found at my Gr. 5 Weebly Page <https://clanh-beebe.weebly.com/gr-5.html> (and it is posted on your Google Classroom page)
3. Please use CRAYONS to color your image. I outlined mine with colored marker. This is optional but I think it adds a lot to the finished work.
4. Color should be applied neatly and boldly (please do not color lightly!). Sample image has also been posted.
5. Please take a picture of your finished art for your Google Classroom file or email it to me.
6. Your finished work of art should be brought back to school when classes resume so don't lose it and keep it clean!

Have fun! - Email me if you have any questions: bbeebe@clanh.org

Mrs. Beebe

Examples of WARM COLORS

Examples of COOL COLORS

Every color has a certain tendency towards what's called warm and cold.
